

**Read First:**

**Copyright: 2012 Media Angels, Inc. All Rights Reserved. May not be duplicated in any form.**

**This class is not to be resold or redistributed in any manner.**

**This class is limited to one family only.**

This includes giving this class away without charge.

**This set includes:**

**Audios**

**Handouts**

**Websites**

**Classes** can be found in individual folders labeled by classes 1-6

There are two separate audios for each class: Younger and Older

You and your children may listen to both. The older class has similar information, yet it delves in deeper and the vocabulary is more difficult.

Class Syllabus for Creation Astronomy  
K-4th Grade

**Class One:** Overview: **The Heavens Declare the Glory of God**—the Universe How great is our God? You children will see when we examine the vastness of the universe. Felice will present this class from the perspective of strapping into our “space ship” and checking all of our gear before we blast off! This short presentation will be hands on having the children up and out of their seats.

**Class Two:** The Solar System—Sun, Moon, and Planets. After an overview we will be ready to dive into the place we call home, our Solar System. Children will be asked to “play act” as we discuss the burning hot sun... the spinning planets and short, fun facts about each.

**Class Three: Big Bang** and Light and its Speed. Can order come out of disorder? It can’t and with a few simple activities we will show this evolutionary theory is full of holes. We will also show how fast light speed is. Be prepared to allow your children to flip lights on and off...and play with the remote control and a mirror (just this once, please?).

**Class Four: The Constellations, the Gospel message in the Stars** Children will learn to identify some simple constellations in the night sky no matter where you live! We will draw some in the sky with our fingers and play a dot-to-dot game as well. Lots of fun for children of all ages.

(A word from Felice: Christians have shunned the study of the stars for years for fear of false teachings, such as the Zodiac. It is time for Christians to take back the teaching of the beauty of the stars and how they point to the glory that is God! The word Zodiac comes from the root “zoad” which comes from the ancient Hebrew word “sodi” which means path or step. The pictures of the stars show the path or the Way of Salvation! By the way, did you realize the Zodiac is actually an incorrect science?)

**Class Five: The Constellations, Gospel message in the Stars Part II** This is a continuation of the presentation from the previous week, with the identification of more stars. We will continue to learn how the constellations teach the Salvation message and give the glory of God!

**Class Six: Space Exploration and the Astronomers**

It is time to strap into our space suits and space ships again and blast off for another fun adventure. We will briefly discuss some of the astronomers and you can make a book about them at home.

## **Creation Astronomy**

### **5th-8th Grade**

**Class One: Overview: The Heavens Declare the Glory of God**—the Universe The overall majesty of the universe will unfold in this one hour class. You will see how the stars point to a Creator God and you will listen, spell-bound as information about the Universe, Galaxy, and the Solar System is presented from a Creationist perspective.

#### **Class Two: The Solar System—Sun, Moon, and Planets**

After our overview we will be ready to dive into the place we call home, our Solar System. Learn the latest information about the planets, a bit of information about each of them and surprising facts that confound evolutionary belief.

**Class Three: Big Bang, the Speed of Light, and The Big Bang Theory**, one of many held onto by evolutionary scientists will be discussed, despite problems that the stars present as well as brief overview of the theory of the speed of light.

**Class Four: The Constellations, the Gospel message in the Stars Part I** overview Christians have shunned the study of the stars for years for fear of false teachings, such as the Zodiac. It is time for Christians to take back the teaching of the beauty of the stars and how they point to the glory that is God! The word Zodiac comes from the root “zoad” which comes from the ancient Hebrew word “sodi” which means path or step. The pictures of the stars show the path or the Way of Salvation! (Besides, children will learn how the Zodiac is actually an incorrect science.)

**Class Five: The Constellations, Gospel message in the Stars Part II** A continuation of a presentation of the original Greek and Hebrew root words of the stars names, and how they teach the Salvation message. [Note: there is much discussion about how some of these names are a stretch and are not original. Editor’s note here, this study is to be used loosely and not as a “gospel” as the word of God in the Holy Bible is sufficient for the study of salvation and should not be added to with any words. However, teaching from a Christian perspective the stars were given to man by God for dominion and teaching the children in this manner points to the glory of God.]

#### **Class Six: Space Exploration and the Astronomers**

The last great frontier is space exploration; we will look at the history and some of the ancient Astronomers. Many of these were Godly men who believed that God created the world!
