

Clay Recipe

Can be used for various crafts, do not eat!

Ingredients:

This Clay Does Not Dry Out Easily:

2 cups of flour
1 cup of salt
4 teaspoons of cream of tartar
2 Tablespoons of oil
2 cups of water (put this in as needed)

Food coloring as needed

Mix the flour, salt and cream of tartar together. Make a well in the middle of the flour with a spoon, Add the oil and 1.5 cups of water. Mix, add more water as needed to make the dough the consistency of clay. Use your hands to mix and knead until all the flour and water are incorporated. This dough does not dry out easily, but it will go bad quickly so keep it sealed and in a cool place. Do not refrigerate. Keep it in a plastic bag or a plastic air-tight bin until you are ready to use it.

Add food coloring to the water before adding it to the dough. You can divide the mixture above into two parts and mix with two different colors such as red and green.

Variation: Can be baked and will dry out if air-dried:

Ingredients:

2 Cups Flour
1 Cup Salt
2 Tbsp Vegetable Oil
3/4 - 1 Cup of Water

Mix together well and store in a plastic bag. Roll out dough and shape. You can air dry this clay by letting it sit out for about five days or more and rotating this to dry. You can also bake at 250 for one hour. Best not to have thick pieces or they will rise and crack. You can paint these creations once they are dry.
